E-ROOM CONSTRUCTION

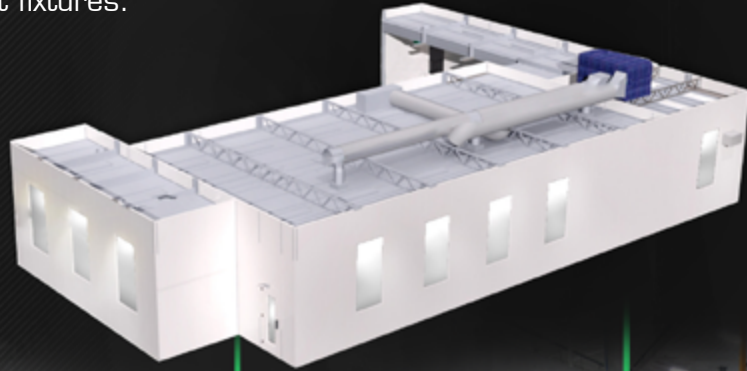

Spray-Tech / Junair's Environmental Enclosures (or E-Rooms) are built to last with sturdy yet lightweight materials. Panel construction consists of two sheets of G-90 galvanized steel which are powder-coated white and insulated with rock wool.

The ceiling is a supported system of 18 gauge G-90 galvanized steel panels, also powder-coated white, with built-in 4-tube T8 fluorescent light fixtures.

Lighting is designed for 50 ft. candles at 3 ft. off the floor. Higher levels of illumination are also available.

The walls of the E-Room have built in electrical receptacles and wall switches that tie into a pre-wired system above the ceiling.

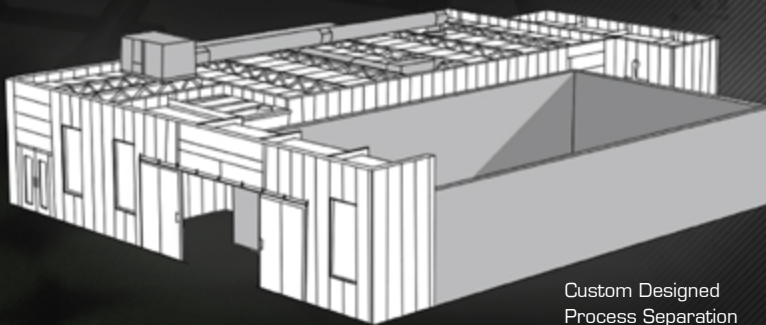

- ECO-FRIENDLY
- WELL ILLUMINATED
- SUPERIOR FIT & FINISH
- 18-GAUGE GALVANIZED
- CUSTOM SIZES AVAILABLE
- MADE IN THE U.S.A

E-ROOM CONFIGURATIONS

Our environmental enclosures come in a variety of different configurations to meet your needs. Rooms are available in single units or multi-room structures and can be custom engineered.

Custom Designed Process Separation

SIZING & DIMENSIONS

Wherever a substructure or multiple room structure is needed, these rooms excel at providing an extremely attractive, sturdy and clean environment. E-Rooms are a good alternative to costly construction services and meet the needs of companies in many different industries.

Available Window Sizes:

Available Room Sizes:

Length:

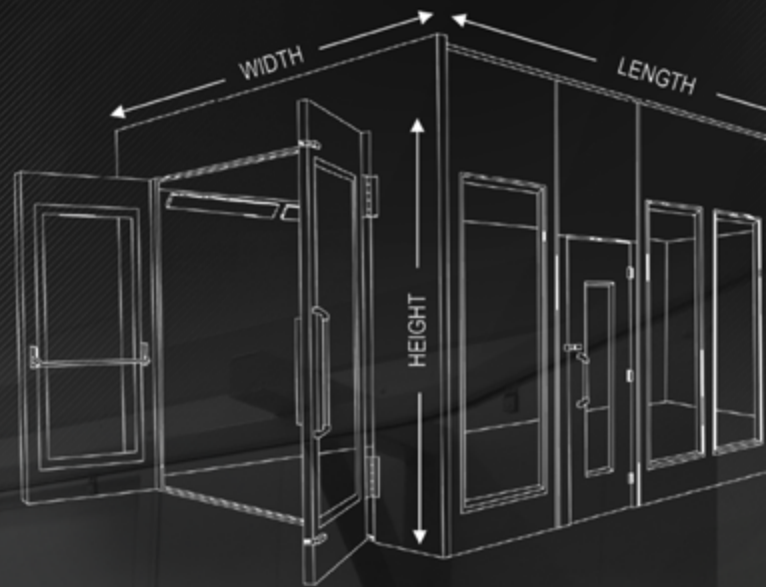

- Infinite

Inside height:

- at least 26'

Width:

- Clear span: 40 ft.
- Supported: Infinite

DOOR TYPES

Spray-Tech / Junair can manufacture many different types of doors for any application.

Swinging doors come in four types: Single, Double, Bi-Fold and Tri-Fold.

Double Swinging Door

Sliding doors come in three types: Pneumatic, Articulating and Rollup.

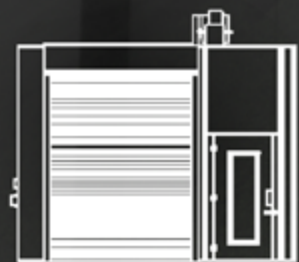

Pneumatic Horizontal Sliding Door

Pneumatic Vertical Sliding Door

Conveyor openings are also available for automated systems.

Rollup Door

QUALITY – RELIABILITY & INNOVATION

For more than two decades Spray-Tech/Junair has manufactured superior finishing equipment, built from quality components to provide years of worry-free operation. Our innovative designs deliver energy and application efficiencies with consistent results.

- Spray-Tech/Junair employs a team of seasoned designers proficient with the latest software and lean manufacturing principles.
- Combined, our engineering staff has well over 100 years of design experience, providing us the ability to maintain continuity in design and allowing us to accurately visualize and test our equipment before it is physically constructed.

Ask our expert engineers to find a practical solution for your process today.

PRODUCING ONLY THE HIGHEST QUALITY FINISHING EQUIPMENT SINCE 1994

Est. 1994 and based in Rialto, CA, Spray-Tech/Junair is an American brand whose products have achieved international reach & relevance.

Spray-Tech/Junair produces some of the world's most efficient industrial finishing products that deliver exceptional results while leading the industry in eco-friendly design. Spray-Tech/Junair is dedicated to doing business without damaging the environment; that's why we utilize solar-panel technology to run our manufacturing facility.
